# *Resume*

---

Speech in a secure and robust manner. This system makes the Files more secure by using the concepts Steganography and Cryptography. Steganography, poor cousin of Cryptography is the art of hiding messages inside other messages such that the very existence of the message is unknown to third party. The goal of cryptography is to make data unreadable by a third party, the goal of Steganography is to hide the data from a third party Through the use of advanced computer software, authors of video and software can place a hidden trademark in their product, allowing them to keep a check on piracy.

## **STRENGTHS:**

- Work hard to achieve the goals in time and accurately.
- Ability to communicate well and adapt to the situation.
- Good analytical ability.
- Self-confidence and Hardworking.
